Mr. Cutting Jr. said they were papared on the part of the plaintiffs but Mr. F. R. Catting was engaged to the Paintiffs but Mr. F. R. Catting was engaged to the Paintiffs but Mr. F. R. Catting was engaged to the Paintiff but Mr. F. R. Catting was engaged to the Paintiff but Mr. F. R. Catting was engaged to near week.

Mr. Staples on the part of the defendents said that this case bad been called three times, and had been set down for this day at the less ames of Mr. Cutting

In a short time afterwards Mr. Bidwell came into court and said that Mr. Cutting was now actually engaged in the examination of a witness in the Mason will case, which was one of conderable importance, and involving property to the smoonth of one militons of collars. He asked to have this case postposed till next week.

Judge Bette said it was not in his power or do that. The trials of the parties charged with the steambest disasters are set down for next week and he could not allow this matter to interfere with the climinal business.

The case was ultimately set down for Thursday moreing, to which time the court was adjourned.

Jan 4.—Some returns of precesses in admiralty were made, and the Judge announced that he could not say when Judge Judson will be able to attend, as he is now unwell. It may therefore be necessary to call on Judge Hall or Judge Premite to eit in the District Court whilst he (Judge Bett-) sat in the Arcuit. The calendar, however, would not be called this week.

The Grand Jury entered the Court, and the foreman, Mr. Jan G King Jr said that he was requested by them to sak the Judge to charge them as to what constitutes the crime of wurder, and what distinguishes it from man-shaughter, under the laws of the United States. The Judge then entered into a clear, minute, and slaborate exposition of the law, and pointed out the legal constituents of the crimes of saurder and manisughter, under the laws of the United States. The Grand Jury them again retired.

Myswerious Disappearance.—Painful appropensions are entertained in regard to William Schuyler, brother of the Meers Schuyler of this city and connected with them in business in New York. He was last seen on Thurday afternoon of last week at his office. A letter, enclosing a check to a considerable amount to close up the coal account of the firm was malled in this city on that day, and not hearing from it, one of his brothers went down to accretain the cause of the delay. On entering the office or thursday, it was found open as if William had just left it, and the letter above referred to, was found, unopened, on the table. Immediate search was insettuted out no trace could be obtained of him. He was known to almost every commercial man in New York, but none of them had seen him since last Thursday. The search was kept up, without intermission in all directions but without avail. Up to last evening, nothing had been heard of him. This disappearance is certainly mysterious william. Blue his brothers, was a man of strict business habits, prompt and attentive to every day entrusted to him. Of course the most painful appreheneics are felt and it is feared that some fatal colemnity has be allen him. There is, however, yet hope and a large of city of intimate triends and business as quaintances will rejoine to hear of his discovery and mainty.

MONEY MARKET.

TUESDAY, Jan. 4-6 P. 1 There was a very active market this morning, but the disposition to sell was so general that prices depresiated. In some instances the decline was serious. All the lead-In some instances the decline was serious. All the leading fancies were freely offered, and the bears put out
centracts on long time at prices very far below those
current for each. Phoenix Coal Company was the most
preminent at the first board to day and sales were made,
seliers' option, twelve months, at 6 to 10 per cent below
the market value. Nicaragua was active, but not very
well sustained. Morris Canal was in domand, but purchasers required a concession in prices, and obtained it.
The greatest decline to day was in Crystal Palace. A small
lot was sold at 155. The last previous sale was 172, showlot was sold at 155. The last previous sale was 172, showing a decline of 17 per cent. The advance in this stock was too rapid. It brought considerable upon the market, and it has resulted as was anticipated. Cumberland Coal, and it has resulted as was anticipated. Cumberland Coal, Parker Vein, and New Creek Coal were active and firm at our quotations. The New Creek Co. have just completed negotiations for the purchase of a large tract of land at Lecust Point, near Baltimore for a coal depot. It has an extensive water front, with depth sufficient to lead large vessels, and within about five hundred feet of the track of the Baltimore and Ohio Railroad. This will give the county will the ground it will account. the company all the ground it will ever require for a coal as possible. Long Island is rapidly running down again.

There is every probability of our predictions relative to
this stock being realized. Sellers short at fifty per cent, have made a good thing of it. We have no change of active and steady. Canton Company is almost entirely neglected. The stock of the Great Northern Lead Company was put on the books of the Board of Brokers, yesterday, and has been called at each board sines, without sales. Holders do not seem disposed to sell, and exhibit no desire to fix a price in the market. The stock is in the hands of some of our largest and shrawlest capitalists, who are of some of our largest and shrewdest capitalists, who are not compelled to sell, and will not until purchasers come up to their ideas of its sound value. There is very little doubt but that as soon as the position, prospects, and resources of this company are well known, the stock will command such prices as may induce some of the present holders to realise. We assex the last mouthly report of the the Great Northern Lead Company :-GREAT MORTHERN LEAD MINING COMPANY.

GREAT HOATHERN LEAD MINISTER COUNTY TO THE EXECUTIVE COMMUTTER:—
Gentlemen—I beg to report that, during the past month, the company's minas have been very actively at work. The number of persons of all sorts employed has been about one hundred and twenty four. The Coal Hill menth, the company's mines have been very solively at work. The number of persons of all sorts employed has been shout one hundred and twenty four. The Coal Hill adit has been made good for one hundred and ten feet farther, being new in all, three hundred and ten feet. About one quatter of a mile of drain has been cut in the fist below the blieff to carry off the water pumped by the new engine so that but little of it may sink back to the mine. The dressing heuse was finished, all but the floor, on the 20%. A great deal of work has been done in levelling the floor below the whim shaft. The whim round is fluithed, and the whim nearly ready to erect. The coain has gone to work very hundsomely. There is now but thit ewster left in the mine as she has forked it at the rate of five fathoms per day, working six strokes per minute. This plees of machinery is a good job, and more than answers my expectations. The house water plunger has been fixed to adit, and works well. The pit work has been well put down. We shall have, from all I can see, twenty-two feet of the shaft to cut down, which will take probably three weeks, so that by the end of this menth the shafts in this mine will begin to tink regularly at the depth of 200 feet. I have been able, since my last report, to inspect the Coal Hill indeen the extreme weet, in the adit. It is split into two parts. The former company, by some strange reason, drove on the south branch, leaving the main lode stand. I should take it to be eighteen inches big, and is see no reason why they abandoned the lode there, as it looks very favorable, and will seen unter I shall drive upon it as soon as possible. At the Union mine we are breaking ore that is in our way in driving the bottom levels. The engine shaft will soon begin to go down. The large ore house is finished. I have ordered another whim, changing house &c to be erected on the next shaft east, and on the 10th December that will be near shaft east, and on the 10th December that will be near that east, and on the 10th Decemb
